Assignment 3A

Background:

You are creating application that is going to track the swim clubs, their swimmers, swim meets and results.

References: Please refer to "General Assignment Requirements" document posted on eCentennial.

Part 2A:

Modify Assignment 2 to satisfy the following.
1. Add Test project to the solution in order to unit test the code in the class library. You will use this test project to test that the changes you will do in the second part of assignment 3 did not break your code.

Additional requirements:
1. You can add and/or modify any code from Assignment 2 to fix the problem you had in the assignment.

Note: This is the first part of the assignment 3 and must be submitted by the deadline in the drop box. The submission should be passing all the tests. This part will not have a separate grade as it will be marked together with part B. However, if not submitted will carry 10% penalty.
The minor changes and fixes to this part are acceptable before the submission of the second part of the assignment 2.

Submission: Submit the solution to Assignment3A drop box by drop box deadline.
